

i-Suite® Fire Safety Ecosystem

Cloud-Based Modular Approach

The *i*-Suite® fire safety ecosystem is a unified, cloud-based, modular platform designed to connect all aspects of fire and life safety operations across local communities and state regulatory environments.

Platform Architecture Overview

The *i*-Suite® model centers around a cloud-based system-of-record that integrates critical modules across the fire safety lifecycle.

Core Regulatory Modules

- Licensing
- Plan Review
- Inspections
- Enforcement
- Investigations & Evidence
- Online Training

Local Community & Public Safety Modules

- Public Safety Operations
- Fire Incident Reporting
- Community Risk Reduction (CRR), Public Education, Smoke Alarms
- Emergency Management
- Online Sales & Management

Digital Infrastructure Layer

- Digital Tagging (*i*-Trax®)
- 3rd Party Reporting Integration
- Real-time Compliance Data Capture

Key Outcomes

- Unified visibility across jurisdictions
- Improved inspection integrity and accountability
- Real-time operational intelligence for AHJs
- Scalable architecture across multiple regulated asset types
